

Lesson 6.1 Understanding Functions and Relationships Day 1

Week 1 Wednesday Course 3 Warm-up

A system of equations is given.

$$7x + 2y = 25$$

$$2x + 2y = 10$$

What are the values of x and y in the solution to the system?

$x =$

$y =$

Simplify Expression

$$\left[\left(\frac{2}{3} \right)^2 \cdot \left(\frac{2}{3} \right)^{-1} \right]^3$$

A ladder 18 feet long is leaning against a wall. The base of the ladder is 9 feet away from the wall. Find the distance from the top of the ladder to the ground.

Week 1 Wednesday Course 3 Warm-up

A system of equations is given.

$$7x + 2y = 25$$

$$2x + 2y = 10$$

What are the values of x and y in the solution to the system?

$$X=3$$

$$Y=2$$

$x =$

$y =$

Simplify Expression

$$\begin{aligned} \left[\left(\frac{2}{3} \right)^2 \cdot \left(\frac{2}{3} \right)^{-1} \right]^3 &= \left[\left(\frac{2}{3} \right)^{2-1} \right]^3 \\ &= \left[\left(\frac{2}{3} \right)^1 \right]^3 \\ &= \left(\frac{2}{3} \right)^{1 \cdot 3} \\ &= \left(\frac{2}{3} \right)^3 \end{aligned}$$

A ladder 18 feet long is leaning against a wall. The base of the ladder is 9 feet away from the wall. Find the distance from the top of the ladder to the ground.

15.6

Lesson 6.1 Understanding Functions and Relationships Day 1

Objective

TSW understand that a function is...

***relation between set of inputs and outputs**

▶ A function is a relation between a set of inputs and a set of outputs, in which every input has exactly one output. You can use tables, graphs, and equations to represent many functions.

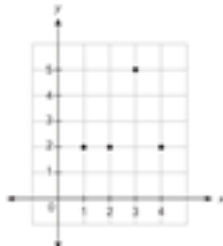

Common Core State Standards

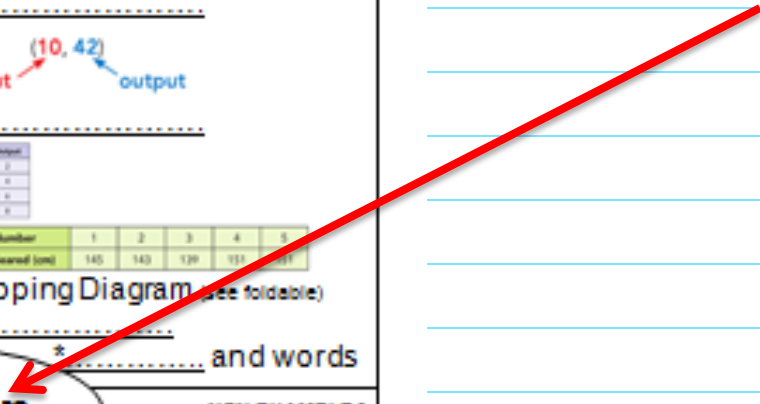

8F1 Understand that a function is a rule that assigns to each input exactly one output. 8F4 Construct a function to model a linear relationship between two quantities 8F5 Describe qualitatively the functional relationship between two quantities by analyzing a graph...

Mathematical Practices *MP1 Solve problems/persevere MP2 Reason MP 4 Model Mathematics*

Lesson 6.1 Understanding Functions and Relationships Day 1

TSW understand that a function is a relation between inputs and outputs. 8F1

DEFINITION	CHARACTERISTICS																						
<p>A relation pairs a set of _____ with a set of _____.</p>	<p>There are multiple ways to represent a relation:</p> <ul style="list-style-type: none"> * _____  * _____ <table border="1" data-bbox="956 556 1052 635"> <thead> <tr> <th>Input</th> <th>Output</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>2</td> </tr> <tr> <td>2</td> <td>4</td> </tr> <tr> <td>3</td> <td>6</td> </tr> <tr> <td>4</td> <td>8</td> </tr> </tbody> </table> <table border="1" data-bbox="956 642 1333 692"> <thead> <tr> <th>Athlete Number</th> <th>1</th> <th>2</th> <th>3</th> <th>4</th> <th>5</th> </tr> </thead> <tbody> <tr> <td>Height Cleared (m)</td> <td>145</td> <td>143</td> <td>139</td> <td>151</td> <td>151</td> </tr> </tbody> </table> *Mapping Diagram (see foldable) * _____ * _____ and words 	Input	Output	1	2	2	4	3	6	4	8	Athlete Number	1	2	3	4	5	Height Cleared (m)	145	143	139	151	151

<p>Graphically</p>  <p>Write ordered pairs</p>	<div style="border: 1px solid black; border-radius: 50%; padding: 10px; display: inline-block;"> <h2 style="margin: 0;">Relation</h2> </div>																						

Lesson 6.1 Understanding Functions and Relationships Day 1

DEFINITION

A relation pairs a set of _____ with a set of _____.

Lesson 6.1 Understanding Functions and Relationships Day 1

DEFINITION

A relation pairs a set of inputs with a set of outputs.

Lesson 6.1 Understanding Functions and Relationships Day 1

CHARACTERISTICS

There are multiple ways to represent a relation:

- *
.....
- 

(10, 42)
input → ← output
- *
.....
- | Input | Output |
|-------|--------|
| 1 | 2 |
| 3 | 4 |
| 5 | 6 |
| 7 | 8 |

Athlete Number	1	2	3	4	5
Height Cleared (cm)	145	143	139	151	151
- * Mapping Diagram (see foldable)
- *
.....
- *
..... and words

Lesson 6.1 Understanding Functions and Relationships Day 1

CHARACTERISTICS

There are multiple ways to represent a relation:

*Ordered pairs

*Input/Output Table

Input	Output
1	2
3	4
5	6
7	8

Athlete Number	1	2	3	4	5
Height Cleared (cm)	145	143	139	151	151

*Mapping Diagram (see examples)

*Graphically

*Equations and words

EXAMPLES/MODELS

Rela

Graphically

Write ordered pairs

Lesson 6.1 Understanding Functions and Relationships Day 1

EXAMPLES/MODELS

Relat

Write ordered pairs

$\{(1,2), (2,2), (3,5), (4,2)\}$

$$y = 4x + 6$$

I notice that the equation is written in slope intercept form

Lesson 6.1 Understanding Functions and Relationships Day 1

tion

NON-EXAMPLES

A large empty rectangular box with a thick black border, intended for writing non-examples. The box is positioned on the right side of the page, below the 'NON-EXAMPLES' header. The background of the page features light blue horizontal lines and a vertical pink margin line on the left.

Lesson 6.1 Understanding Functions and Relationships Day 1

tion

NON-EXAMPLES

4 constant

7X expression

X variable

CHARACTERISTICS

There are multiple ways to represent a relation:

*Ordered pairs

*Input/Output Table

Input	Output
1	2
3	4
5	6
7	8

Athlete Number	1	2	3	4	5
Height Cleared (cm)	145	143	139	151	151

*Mapping Diagram (see examples)

*Graphically

*Equations and words

Lesson 6.1 Understanding Functions and Relationships Day 1

One to One Relation Mapping Diagram

Relation Consists of Ordered Pairs
 $\{(A,60), (B,61), (C,62), (D,59)\}$

One to One Relation Real World

Every student has a social security number. Other examples include: School ID and Finger print.

Many to One Relation Real World

Many students have can the same test score. Other examples include students with same age.

Many to One Relation

Relation Consists of Ordered Pairs
 $\{(A,60), (B,60), (C,70)\}$

One to Many Relation Mapping Diagram

Relation Consists of Ordered Pairs
 $\{(A,60), (A, 61), (A, 62), (B, 59)\}$

One to Many Relation Real World

Other examples include: School ID and Finger print. Alphabetize by first name

Many to Many Relation Real World

Other examples include: Black Friday Shopping– Items relation to Items Sold

Many to Many Relation Mapping Diagram

Relation Consists of Ordered Pairs
 $\{(A,60), (A, 61), (B, 62), (C, 62)\}$

Lesson 6.1 Understanding Functions and Relationships Day 1

One to One Relation Mapping Diagram

Relation Consists of Ordered Pairs
 $\{(A,60), (B,61), (C,62), (D,59)\}$

One to One Relation Real World

BE SURE TO SHOW ONE TO ONE CROSSING ACROSS EACH OTHER

Every student has a social security number. Other examples include: School ID and Finger print.

Many to One Relation Real World

Many students have can the same test score. Other examples include students with same age.

Many to One Relation

Relation Consists of Ordered Pairs
 $\{(A,60), (B,60), (C,70)\}$

One to Many Relation Mapping Diagram

Relation Consists of Ordered Pairs
 $\{(A,60), (A, 61), (A, 62), (B, 59)\}$

One to Many Relation Real World

Other examples include: School ID and Finger print. Alphabetize by first name

Many to Many Relation Real World

Other examples include: Black Friday Shopping– Items relation to Items Sold

Many to Many Relation Mapping Diagram

Relation Consists of Ordered Pairs
 $\{(A,60), (A, 61), (B, 62), (C, 62)\}$

Guided Practice

Complete.

- 1 Describe the relation between the inputs and the outputs.

The relation between the inputs and the outputs is a ?-to- ? relation.

Lesson 6.1 Understanding Functions and Relationships Day 1

1 Describe the relation between the inputs and the outputs.

The relation between the inputs and the outputs is a ?-to- ? relation. **many; one**

Lesson 6.1 Understanding Functions and Relationships Day 1

2 Describe the relation between the inputs and the outputs.

The relation between the inputs and the outputs is a ? -to- ? relation.

Lesson 6.1 Understanding Functions and Relationships Day 1

2 Describe the relation between the inputs and the outputs.

The relation between the inputs and the outputs is a ? -to- ? relation. **many; many**

3 The table shows the relation between the heights of five statues and their weights.

Height (in.)	40	35	56	70	47
Weight (lb)	85	84	90	99	86

Copy and complete the mapping diagram to show the relation between the heights of the five statues and their weights. Then identify the type of relation between the heights and the weights.

The relation between the heights and the weights is a ?-to-? relation.

3 The table shows the relation between the heights of five statues and their weights.

Height (in.)	40	35	56	70	47
Weight (lb)	85	84	90	99	86

Copy and complete the mapping diagram to show the relation between the heights of the five statues and their weights. Then identify the type of relation between the heights and the weights.

Copy and complete the mapping diagram to show the relation between the heights of the five statues and their weights. Then identify the type of relation between the heights and the weights.

Lesson 6.1 Understanding Functions and Relationships Day 1

Practice 6.1 #1-8

Name: _____

Practice 6.1

Given the relation described, identify the input and the output.

- Mrs. Thomas wants to find out the price charged for the same stereo speaker at different stores.
- Five students, Jessie, Patrick, Wayne, Colin, and Susie, have different heights. Their teacher wants to know their heights.
- Ginny wants to know what after-school activities each of her friends signed up for so she knows whether she shares the same interests.

Based on the mapping diagram, state the type of relation.

4

Input	Relation	Output
AA	↔	0
BB	↔	1
CC	↔	2

5

Input	Relation	Output
AA	↔	0
	↔	1
	↔	2

6

Input	Relation	Output
AA	↔	0
BB	↔	1
CC	↔	2

Draw a mapping diagram to represent each relation. Then identify each type of relation.

7

The table shows the numbers of various types of fruit sold in a supermarket. Draw a mapping diagram to represent the relation between each fruit and the number sold by the supermarket. Identify the type of relation between the fruit and the number sold.

Input, Fruit	Apple	Apricot	Lemon	Orange	Papaya
Output, Number Sold	256	187	256	256	93

Course 3

Challenge-

*Solve created equations

“Pick a Snowflake”

*Real World Problem (website)

*BuzzMath

Lesson Check #1 & 5– understand relations and identify types of relations

Ticket Out the Door- Connect, Extend, Challenge

1. How are the ideas and information presented **CONNECTED** to what you already knew?
2. What new ideas did you get that **EXTENDED** or pushed your thinking in new directions?
3. What is still **CHALLENGING** or confusing for you to get your mind around? What questions, wonderings or puzzles do you now have?
