

Finding Slope in Real World

This will be one of the final grades for the semester. You will need to create a collage using magazine cut outs OR create a Word Document, flipagram, prezzi, etc. Each picture must be LABELED in order to receive points. Your project must be NEAT and ORGANIZED.

1. Find a picture that has an undefined slope in it. (1)
2. Find a picture that has a zero sloped line in it. (1)
3. Find a picture that has a positive slope in it. (1)
4. Find a picture that has a negative slope in it. (1)
5. Find a picture of something outside our school, but in the community that shows positive slope and explain exactly where it was located. (1)
6. Submit a picture of something outside our school, but in the community that shows negative slope and explain exactly where it was located. (2)

Here is an example:

Example of
Zero Slope
